SUMMARY

Full Stack Web Developer and 4th-year BS Information Technology (Business Analytics) student, focused on web systems, AI integration, and data analytics. Experience delivering client-facing systems for a local government water utility, building React and Next.js frontends on Node.js and PHP backends with PostgreSQL and MySQL.

EXPERIENCE

Full Stack Web Developer | Lead Developer (2026 – present)

- Engaged by **Tanauan City Water District** to design and deliver a project monitoring system covering manual monitoring active infrastructure projects, replacing spreadsheet / manual process.
- Gathered requirements directly with client stakeholders and translated operational workflows into database schema and application logic.
- Handled deployment, client handover, and post-delivery fixes.

SKILLS

- Languages: TypeScript, JavaScript, Python, PHP, Java, C#
- Frontend: React, Next.js, React Native, Tailwind CSS
- Backend: Node.js, Express.js, Prisma, REST API design and integration
- Databases: PostgreSQL, MySQL, MongoDB, Supabase
- AI / ML: TensorFlow Lite, XGBoost, MobileNetV2, LLM-based feature integration
- Data & BI: Power BI, DAX, Power Query, data modeling
- Tools: Docker, n8n, Git, GitHub, Postman, Figma

PROJECTS

- **Integrated Payroll & Mobile Commercial System (2026)** — Capstone for Tanauan City Water District. Payroll processing module plus a mobile commercial system for customer billing / meter reading / service requests / announcements. Built with React Native, Node.js/Express, MongoDB, Prisma.
- **TWD Project Monitoring System (2025)** — Client system for Tanauan City Water District. Tracks infrastructure project status, milestones, and progress reporting, with role-based access for engineering staff / management. Built with Next.js 16 + Prisma 7 + Supabase (Postgres/Auth/Storage) + Tailwind/shadcn.
- **School Evaluation System (2026)** — React/Vite on the frontend with Firebase (Firestore + Authentication + Cloud Functions) on the backend
- **Vehicle Rental System (2025)** — PHP/MySQL rental platform with booking flow, XML-based inventory records, and an admin dashboard for fleet management and booking approval.
- **Online Thrift Shop (2025)** — Full-stack e-commerce platform on PHP/MySQL with a normalized relational schema for listings, accounts, and inventory; mobile-responsive storefront in Tailwind CSS.
- **Malvar Bat Cave Café System (2025)** — Café management system with product catalog, order handling, inventory control, and multi-role access for admin and staff.
- **Portfolio Website (2025)** — Responsive personal site showcasing projects and stack. (jordiee.me)
- **Time Scheduling System (2024)** — A scheduling management system built with Java (OOP) and MySQL to efficiently manage schedules and streamline time-based operations.

EDUCATION

Bachelor of Science in Information Technology — Major in Business Analytics

Batangas State University – The National Engineering University (2023 – 2027 expected)

- Relevant coursework: Advanced Systems Integration and Architecture, System Analysis & Design, Data Structures, Database Management, Web Application Development, Business Analytics

CERTIFICATIONS

- Microsoft Power BI Data Analyst — Microsoft (2025)
- Claude 101 (2026)
- Claude Code in Action (2026)
- Introduction to Agent Skills (2026)
